

BEACH KING® II

THE NEXT GENERATION:
BIGGER. FASTER. BETTER.

PICK UP BOTTLE CAPS, SEAWEED, AND CIGARETTE BUTTS IN A SINGLE PASS

The Rockland Beach King® established Rockland as the world leader in beach cleaning technology. For over 30 years, the world has used Beach Kings from Florida to California and Canada to New Zealand.

The Beach King® II is the next generation. A combination of 30 years of experience and valuable user input, the Beach King® II is the undisputed king of beach cleaning machines.

HAIL TO THE KING!

NINE REASONS THE BEACH KING® II RULES

HYDRAULIC DRIVE SYSTEM

A PTO mounted pump makes it easy to attach the Beach King® II to any tractor. An electric control module allows the operator to control the belt speed from the cab as sand conditions dictate.

POWER FEED REEL

The adjustable power feed reel delivers a smooth continuous flow of sand and trash to the conveyor belt for maximum productivity and total cleaning. Feed reel operating height is adjustable to suit different applications, such as picking up seaweed, storm cleanup, or deep cleaning.

CONVEYOR BELT

A tough mesh steel belt separates sand from debris, keeping the sand on your beach. The belt is supported by heavy-duty steel rollers that turn on triple sealed bearings. An optional stainless steel belt is available.

BELT BRUSHES

Two rugged poly brushes swing into position to help clean damp sand. They easily swing out of the way for collecting seaweed.

RUGGED FRAME

The Beach King® II is built to construction machinery standards for years of dependable, trouble free service. Built from high strength, heat-treated alloy steel. It is not some bolted together mechanical nightmare that sponsors corrosion. An optional stainless steel frame is available for severe service applications.

BUCKET

The new Beach King® II bucket holds 2.2 cubic yards of debris. More time is spent cleaning the beach and less traveling to a trash container or truck. The bucket can dump material at any height up to a maximum of 9 feet.

NEW SIFTING ACTION

The BKII sifts sand faster than ever because of improved belt action. This translates to less sand in the bucket and more clean beach per hour.

OPTIONAL SUPERSHIELD™ PROTECTIVE COATING

Another Rockland exclusive. Supershield™ coating is the latest in beach cleaner protection. Similar to truck bed liner material, Rockland's tough and durable special formula protects the Beach King® II from corrosion, scratches, impact, and color fade. Far superior to galvanizing, there is no better way to ensure the long life of your beach cleaner.

GROOMER

The groomer is engaged when the belt is activated and automatically lifts from the sand when the belt is stopped. The groomer leaves your beach the way it should be - safe, smooth, and clean.

Beach King II Specifications	
Height	8' 9"
Width	101"
Cleaning Width	90"
Length Overall	21' 3"
Bucket Capacity - yd ³ Dump Height (Maximum)	2.2 9'
Tires	14L-16.1SL High-Flotation
Conveyor Belt Standard Optional	Alloy Wire Mesh Stainless Steel Bar
Reel Diameter	30"
Weight - Standard Machine	8390 lbs.

Specifications subject to change without notice.

Long Life Guarantee

All Beach King® II frames that are protected with Supershield™ are guaranteed for 10 years against any failure whatsoever caused by rust or corrosion.

TOW TRACTOR INFORMATION

The minimum requirements are a 65 HP agricultural tractor with a 540 RPM PTO, 3-point hitch, and flotation tires.

WARRANTY

The Rockland Beach King® II is guaranteed against failure due to defective design, workmanship or materials for a period of one year or 2,000 hours.
